IT IS PROHIBITED BY LAW TO REPRODUCE OR TRANSMIT THIS INFORMATION.

THIS IS UNEVALUATED INFORMATION

25X1

On 12 October 1954, two Soviet scientists of the Moscow Institute for Pharmaceutical Research visited the VEB Jenapharm Plant in Jena in order to study the facilities available there for the production of the D 2 preparation. The Soviets were interested in information on the production of a pure crystalline D 2. The Soviets have, allegedly, so far only been able to produce, by industrial methods, a D 2 preparation which was 50 % impure owing to the presence of a yellowish resin.

Comment: At the Jenapharm Plant in Jena all pharmaceutical products are manufactured according to standards which are not valid in the U.S.A.
